

Control HuB

A Total Logistics Management Suite

Modern logistics is complex. Planning, execution, fleet, stock, and yard operations often run on disconnected systems - the result is limited visibility, delayed decisions, inefficiencies, and operational risk.

Control HuB brings everything together. A single, connected logistics platform that unifies planning, execution, and insight end to end.

Rb

Route Builder

Dynamically plans and optimizes routes, balancing cost, service levels and real world constraints.

Em

Execution Manager

The control tower, providing live actionable visibility across the operation as it happens.

Dj

Digital Journey

Powers last mile execution - with in field workflows electronic proof of delivery and real time driver feedback.

Fp

Fleet Pro

Delivers live vehicle tracking, fuel measurement and performance intelligence across the fleet.

Sm

Stock Master

Enables mobile stock control, eliminates manual counts and improves inventory accuracy.

Ym

Yard Manager

Provides gate in to gate out visibility, optimising yard flow, bay utilisation and turnaround times.

Removing silos and enabling real-time data flow, empowering faster, smarter decision-making.

Control HuB is the backbone of modern logistics - execution built for visibility, efficiency and scale.
