

From gate-in to gate-out, our live yard management system optimizes bay schedules, reduces congestion, delivers visibility and insights you need to keep your supply-chain flowing.

Smarter **Schedules**. Faster **Flow**. Complete **Visibility**.

With live tracking, intelligent bay scheduling, and dwell time analytics, it streamlines asset flow from entry to exit—reducing delays, eliminating bottlenecks, and maximizing yard efficiency. Whether you're managing a high-volume depot or a regional distribution center, **Yard Manager** ensures every move is planned, tracked, and optimized.

Visibility

Gain full control over vehicle, trailer and asset movement with live yard status updates, zone tracking, and real-time optimization.

Accuracy

Automate bay scheduling and reduce bottlenecks by allocating vehicles to the right bays at the right time, based on live yard conditions and business rules.

Efficiency

Track dwell times, identify delays, and analyze yard efficiency with powerful metrics and reporting tools that turn yard activity into performance insight.

Why choose **Yard Manager**?

Automated Bay Scheduling

Eliminate conflicts and delays with intelligent, priority-based bay allocation.

Exception Alerts & Live Notifications

Stay ahead of disruptions with real-time alerts for unassigned vehicles, late arrivals, and yard congestion.

Dwell Time Optimization

Track and reduce idle time to increase throughput and efficiency.

Asset Tracking & Location Accuracy

Know exactly where every asset is—no more misplaced trailers or guesswork.

Scalable, Site-Agnostic Control

Manage one yard or many with a flexible system that adapts to your operation.
