Stock Master

First and last mile intelligent distribution tool, turns complex routing challenges into cost-saving opportunities, optimizing your delivery, collection, and service routes in real-time, boosting efficiency and profitability.

Efficiency defines success

Complex customer service requirements and rising transport costs pose significant challenges in today's logistics landscape. Efficient route planning isn't just beneficial—it's essential for maintaining profitability and staying competitive.

Meet **Route Builder**, powering first and last mile distribution planning of global brands.

Our intelligent platform turns complex routing challenges into cost-saving opportunities, optimizing your delivery, collection, and service routes in real-time, boosting efficiency and profitability.

Save Up to 30% on Transport Costs

Reduce fuel and time waste with intelligent and efficient routing.

Improve Customer Satisfaction

Meet constrained arrival times using realistic traffic data.

Turn Complexity into Predictability

Models complex business rules and constraints with ease.

Scale Effortlessly, Seamlessly

Adapts to your operation, whether single-site or multi-site.

Why Choose Route Builder ?

Powerful Integration:

API integration to your business systems.

Actionable Intelligence:

Monitor a robust set of operational and strategic KPIs and metrics anywhere, anytime.

Cloud-Based Flexibility:

Access route planning tools anytime, anywhere—no hardware investment required.

Cost-Effective SaaS Solution:

Flexible, pay-as-you-go subscription model. Our transparent pricing ensures there are no hidden charges or long-term contracts, allowing you to adjust your plan as your fleet size changes.

Take Control of Your Routes Today! Contact our team to schedule a personalized demo and discover how **Route Builder** can drive efficiency and profitability for your business.

Execution Manager

A real-time control tower that merges planned routes with live telemetry data. Provides ultimate visibility, offering meaningful metrics and actionable intelligence that empowers your fleet to operate at peak efficiency.

Actionable Visibility

In today's dynamic logistics environment, **executing your optimized routes** as closely as possible to the plan is crucial. Unscheduled stops, delayed departures, and deviations can significantly impact your profits and customer satisfaction.

Meet **Execution Manager**, the real-time distribution control tower from Sunstone Logistic Systems. By merging planned routes with live tracking data from GPS and mobile telemetry, **Execution Manager** provides ultimate visibility, offering meaningful metrics and actionable intelligence that empowers your

Ultimate Fleet Visibility

Monitor live vehicle activity, stop status, depot times and route progress.

Actionable Intelligence

Access comprehensive KPI dashboards with metrics like route adherence, customer hit rate and cost per trip.

Optimize Efficiency

Reduce transport distribution costs by up to 22% when combined with Route Builder.

Automated Notifications

Alert your customers and operational staff when a vehicle has been dispatched, running late or delivery completed.

Why choose Execution Manager?

- Operations Management** With the Fleet Status Board (live updates) manage customer service and satisfaction by allowing fleet supervisors to monitor , act on live delivery exceptions in the field, mitigate risks of poor usage of resources and non-delivery.
- Strategic Management:** Gain deep insights into your business with **AI driven planned vs. actual route analysis:** vehicle utilization, work hour compliance, route costs, customer delivery profitability.

Ready to elevate your fleet management? Contact our team to schedule a personalized demo and discover how **Execution Manager** can transform your logistics operations.

Digital Journey

A powerful mobile app simplifying and enhancing in-field driver workflows, enabling drivers to manage deliveries, collections, and services with ease. Track faster, deliver smarter!

Precision in every mile

Digital Journey is a powerful mobile app designed to simplify and enhance in-field driver workflows, enabling drivers to manage deliveries, collections, and services with ease.

With customizable workflows, real-time tracking and seamless communication, **Digital Journey** keeps your fleet on schedule, accountable and efficient.

Pre-Trip Preparation

- Driver Clock-in
- Inventory Validation
- Vehicle Pre-trip Safety Inspection

On-Route Management

- Live Traffic Avoidance
- Live Tracking & Visibility
- Two-Way Driver Communication
- Live Trip Updates

At the Customer

- Electronic Invoices & Signatures: ePOD
- Real-Time Credits & Returns
- Rate My Service: Questionnaire

Post-Trip Finalization

- Returns & Route Settlement
- Security & Time Management
- Invoice Verification

Why choose Digital Journey?

Customizable Workflows:

Tailor every workflow, from safety to delivery protocols, to fit your organization's unique requirements.

Real-Time Tracking & Updates:

Stay in control with live visibility and instant updates on deliveries, customer instructions and route changes.

Complete Delivery Management:

Navigate with ease, confirm quantities, capture photos and signatures and print or share digital proof of delivery.

Measurable Analytics That Drive Improvement:

Powerful KPI dashboards help you track and optimize on-time deliveries, route efficiency, driver performance, and customer satisfaction, offering actionable insights to continuously enhance operations and service quality.

Providing real-time visibility across your entire fleet and supply chain, our advanced Track & Trace solutions enable precise location tracking, proactive exception management, and improved delivery performance.

Live tracking, zero delays

Track & Trace by Fleet Pro delivers real-time status updates and intelligent insights that empower logistics companies to take full control of their operations.

By combining advanced telematics with intuitive dashboards, our platform minimizes route inefficiencies, cuts unnecessary fuel spend, and reduces downtime.

Businesses gain complete visibility from dispatch to final destination—driving smarter decisions, tighter cost control, and faster, more reliable deliveries. Whether managing a small fleet or a complex national network, **Track & Trace** gives you the tools to optimize every kilometer.

Visibility

Technology that enhances fleet visibility, enabling real-time monitoring, improved efficiency, and better customer satisfaction.

Incident Analysis

Detailed journey data, enabling faster, more accurate incident analysis and improved future prevention strategies.

Risk Reduction

Enhance route monitoring, identify risky behavior, and support proactive decisions to significantly reduce operational risks.

Safety

Track and trace telemetry enhances driver safety by monitoring behaviour, enabling real-time alerts, and promoting accountability.

Why choose Trace & Trace?

Real-Time Fleet Visibility:

Monitor every vehicle live with high precision and full route transparency.

Actionable Operational Insights:

Identify delays, inefficiencies, and risks with smart reporting.

Cost Optimization:

Cut fuel costs, reduce idle time, and eliminate route wastage.

Improved Delivery Reliability:

Enhance customer satisfaction with accurate ETAs and fewer delays.

Enhanced Driver Accountability:

Monitor driver behavior and promote a safety-first culture with real-time alerts.

Provides near-perfect accuracy in live fuel measurement, empowering businesses with actionable insights to combat fuel theft, optimize consumption, and enhance operational efficiency.

Less fuel, more bottom line

Harnessing advanced fuel telemetry and precision analytics, our **Fuel Control** solution delivers real-time, meticulous fuel monitoring across your entire fleet.

Gain actionable insights to detect anomalies, prevent theft, and drive optimal fuel efficiency at scale. With live data streams and enterprise-grade integration, we empower fleet managers to take full control of fuel consumption, minimize operating costs, and maximize asset performance with confidence.

Combat Theft

By accurately monitoring fuel levels, detecting sudden drops, and alerts for unauthorized usage..

Reduce Fuel Costs

Fuel probes track usage precisely, identify inefficiencies, and optimize fuel management, reducing overall fuel costs.

Accurate Budgeting

Fuel probes provide precise consumption data, enabling accurate forecasting, better budget planning.

Scalable

Fuel probes are scalable across fleets, integrating with systems, adapting to various vehicles, and supporting growing operational needs.

Why choose Fuel Control?

Driver Accountability:

Pair fuel data with driver behavior insights to ensure responsible vehicle operation.

Custom Alerts & Reporting:

Set thresholds and receive alerts tailored to your operation—by unit, region, or drive

Exception Reporting:

Receive instant notifications for irregular refueling, rapid drops, or overfills.

Reduced Operational Waste:

Identify and eliminate fuel loss from idling, poor route planning, and harsh driving behaviors.

Supports ESG Goals:

Reduce environmental impact by optimizing consumption and lowering fuel-related emissions.

Fleet Master delivers comprehensive, asset-level control to maximize fleet availability and reduce maintenance costs.

Your fleet, digitally mastered

With real-time diagnostics, predictive maintenance alerts, and advanced reporting tools, **Fleet Master** empowers your operations with the visibility and intelligence needed to stay ahead of costly disruptions.

Comprehensive reporting enables fleet managers to make data-driven decisions that optimize resource allocation, reduce total cost of ownership, and improve overall fleet performance. The result is a more reliable, efficient, and profitable fleet, ready to meet the demands of modern logistics.

Fleet Data Reporting

By accurately monitoring fuel levels, detecting sudden drops, and alerts for unauthorized usage..

Maintenance

Fuel probes track usage precisely, identify inefficiencies, and optimize fuel management, reducing overall fuel costs.

Compliance & Safety

Simplify compliance with automated logs, reports, and regulatory alerts.

Operational Automation

Streamline routine tasks with automated work-flows and smart integrations.

Why choose Fleet Master?

Complete Asset Visibility

Gain a centralized view of every vehicle's status, utilization, and availability across your fleet.

Empower Fleet Managers

Give your team the tools and data they need to make faster, smarter maintenance decisions.

Optimize Fleet Utilization

Identify underused vehicles, rebalance workloads, and increase operational efficiency.

Smarter Fleet Planning

Use accurate data to make informed decisions around asset allocation, replacements, and expansion.s.

Seamless Integration Across Fleet Pro

Works hand-in-hand with Track & Trace, Fuel Control, and Fleet View for a complete, connected fleet ecosystem.

Fleet Pro
Fleet View

Video Telematics improves fleet safety by capturing driving events, monitoring behavior, and delivering visual accountability through AI dashcams.

See every trip, know every risk

Fleet View seamlessly integrates high-definition video with real-time telematics data to deliver clear, actionable insights into on-road incidents, driver behavior, and surrounding conditions.

With intelligent alerts and secure cloud-based footage, it empowers businesses to reduce risk exposure, accelerate dispute resolution, and elevate safety standards across the entire fleet.

Visibility

- HD video paired with live telematics
- 24/7 remote access to journey footage
- Full view of driver behavior and road context.

Incident Analysis

- Instant replay with location and speed overlays
- Quickly resolve claims and disputes
- Clear, time-stamped visual evidence

Risk Reduction

- Real-time alerts for unsafe driving
- Spot risky routes, habits, or hotspots
- Promote accountability through visibility

Safety

- Reinforce a safety-first driving culture
- Use real footage for coaching and training
- Protect drivers, cargo, and your reputation

Why choose Fleet View?

Visual Intelligence That Drives Results

Fleet View delivers more than just footage—it provides the context and clarity needed to make smarter decisions, faster.

Built for Logistics Environments

Engineered to handle real-world fleet conditions, **Fleet View** integrates seamlessly into your operations, no matter the scale or complexity.

From Reaction to Prevention

Move beyond reactive reporting. Use visual data to anticipate issues, coach proactively, and drive continuous improvement.

Scalable, Secure, and Seamless

Designed to grow with your fleet, **Fleet View** offers secure cloud access, easy integration, and flexible deployment across vehicles and regions.

Transform warehouse operations with our mobile app that eliminates manual count errors, automates stock tracking, and seamlessly integrates with your ERP system - delivering world class accuracy with enterprise-level simplicity

Track Every Item. Trust Every Count.

Stock Master is a powerful Android-based application designed to give warehouse teams full control over inventory in real time.

From SKUs and bins to routes and warehouse locations, **Stock Master** captures, manages, and syncs stock data directly from the floor—minimizing errors, improving accuracy, and delivering live insights through a central dashboard.

Visibility

- Real-time access to inventory by SKU, bin, route, and location
- Identify stock variances or shortages immediately

Accuracy

- Eliminate manual capture errors with barcode and dropdown selection
- Ensure real-time updates reflect true inventory levels

Efficiency

- Speed up warehouse processes with mobile-driven workflows
- Easily reconcile variances during audits and cycle counts

Analytics

- Monitor stock movement trends and user activity
- Access summary dashboards for warehouse performance reviews

Why choose Stock Master?

Mobile Stock Capture

Record stock movements, counts, and adjustments at the point of activity via Android devices.

Audit Trail & Data Integrity

Maintain full visibility into who did what, when, and where—ensuring accountability and traceability.

Central Web Dashboard

Access live metrics, stock status, and performance trends from anywhere via a secure web portal.

Multi-Level Inventory Tracking

Track and manage inventory by SKU, bin, route, and warehouse location in real time.

Offline Mode Support

Capture stock data even in low-connectivity areas and sync when back online.

From gate-in to gate-out, our live yard management system optimizes bay schedules, reduces congestion, delivers visibility and insights you need to keep your supply-chain flowing.

Smarter **Schedules**. Faster **Flow**. Complete **Visibility**.

With live tracking, intelligent bay scheduling, and dwell time analytics, it streamlines asset flow from entry to exit—reducing delays, eliminating bottlenecks, and maximizing yard efficiency. Whether you're managing a high-volume depot or a regional distribution center, **Yard Manager** ensures every move is planned, tracked, and optimized.

Visibility

Gain full control over vehicle, trailer and asset movement with live yard status updates, zone tracking, and real-time optimization.

Accuracy

Automate bay scheduling and reduce bottlenecks by allocating vehicles to the right bays at the right time, based on live yard conditions and business rules.

Efficiency

Track dwell times, identify delays, and analyze yard efficiency with powerful metrics and reporting tools that turn yard activity into performance insight.

Why choose **Yard Manager**?

Automated Bay Scheduling

Eliminate conflicts and delays with intelligent, priority-based bay allocation.

Exception Alerts & Live Notifications

Stay ahead of disruptions with real-time alerts for unassigned vehicles, late arrivals, and yard congestion.

Dwell Time Optimization

Track and reduce idle time to increase throughput and efficiency.

Asset Tracking & Location Accuracy

Know exactly where every asset is—no more misplaced trailers or guesswork.

Scalable, Site-Agnostic Control

Manage one yard or many with a flexible system that adapts to your operation.

Success Stories

Coca-Cola Bottlers Africa

(1000+ trucks)

- Between 25%-32% reduction in vehicles used
- Improved space utilization by 24%
- 18% increase in fleet time utilization
- 16% more cases allocated per vehicle using Route Builder

ABInBev Africa

(10 countries – 1800 trucks)

- 16% decreased in distance driven
- 30% reduction in vehicles used

Pepsi Tanzania (SBC Ltd)

(200+ vehicles)

- Reduction in vehicles used by 7%
- Boosting delivered volume by 4%

Heineken South Africa - (3PL Liquor Runners)

(+-100 trucks)

- 10% reduction in vehicles used by optimizing preloaded trailers

SBC Pepsi Tanzania

"We now have high level visibility, bringing tangible benefits to the business. It has been a pleasure working closely with the Sunstone team, who are both professional and passionate in implementing and supporting their system."

- Chief Executive Officer

International Beverages PLC

"I would like to confirm that we have been working with Sunstone Logistic System for several years, their Services and Products have provided great value. The optimization achieved allowed for a positive return on the investment made."

The Sunstone Team are professional and committed to implementing and supporting their systems, they are a pleasure to work with when it comes to integrating external systems with theirs." - Operation Manger

Dovetail

"The optimisation achieved allowed for a positive return on the investment made." - Commercial Director

Nile Breweries

"The project has been running for the past four years and the ABInBev Group have seen a very positive return on investment." - Transport Execution
